Make your own plant portrait at home!

Happy Earth Day! Take advantage of this beautiful day to create a plant portrait by going outside and using the objects you find in your surroundings. You can do this in your backyard or at your local park. Just make sure you practice social distancing.

Materials

- Piece of paper for your background.
- Earth objects such as: leaves, nuts, pinecones, twigs, tree bark, flower petals, rocks, etc.
- Scissors (to cut your objects into the shapes you want)
- Hot glue (This is optional if you would like to glue your objects onto the paper)

Step 1

Look at your objects closely to see the various shapes, colors, and textures you can use to create a face outline, eyes, eyelashes, lips, neck, and hair.

Step 2

Create your face shape. Thin twigs and grass are great objects to use for this step.

Step 3

Create facial features! Does your portrait have eyes, eyebrows, a nose, eyelashes?

Step 4

Add some hair! Maybe include a hat, earrings, or a shirt.

Step 5

When your finished, share your portrait on our facebook page and make sure to use #EiteljorgAtHome and #MuseumAtHome.
